ALUMINIUM WINDOWS DOORS & CONSERVATORIES

Aluminium is a high-strength & lightweight material used in every facet of the modern construction industry. From patio doors, to curtain-walling in commercial buildings - Allstyle manufacture products for many applications in an almost limitless range of styles and colours to suit any project.

The polyamide thermal break in our product range achieves excellent thermal insulation, and meets building regulations Part L with considerably reduced u-values.

Contact us today to discuss your next building or home improvement project.

ALLSTYLE IS THE COMPLETE GLAZING SYSTEM FOR RESIDENTIAL & COMMERCIAL BUILDING PROJECTS

SLEEK AND CONTEMPORARY STYLING

LIGHT AND SPACE

The strength to weight ratio of aluminium allows us to make frames with slim profiles that are neat in appearance while also allowing natural light into your property. We can also create larger frames in aluminium to reduce sightlines and help you make the most of the view out of your home.

OUR RANGE OF ALUMINIUM BIFOLDING DOORS ALLOW YOU TO SEAMLESSLY MERGE YOUR HOME OR CONSERVATORY WITH YOUR GARDEN AND THEY ARE COMPLEMENTED PERFECTLY BY THE ALLSTYLE FLUSH LOOK WINDOW SYSTEM.

BIFOLDING DOORS

Allstyle bifold doors, manufactured from slim thermally broken aluminium profiles, provide strength and security. Fold and slide the panels back to the left or right and open up expansive, unobstructed, access to a patio, garden or outside space.

Folding doors for internal use can be specified with a low threshold or a rebated track so that two floor levels can remain constant. Visofold aluminium folding doors have a low threshold which can be recessed into the floor.

- Reduced sightlines
- Square edge profile
- Fabricated using mitred corners
- Marine grade powder coat available
- u-Value: 1.3 W/m^{2}K achieveable dependant on chosen glass spec
- Frame Width: 97.5mm
- Frame Depth: 70mm
- Glass: 28mm double/triple glazed
- Max o/a height (per sash): 2500mm
- Max o/a width (per sash): 1200mm
- Max Sash Weight: should not exceed 100kg
- Doc L 2010: Yes

OPEN UP AN ENTIRE WALL

ROOMS WITH UNINTERRUPTED VIEWS

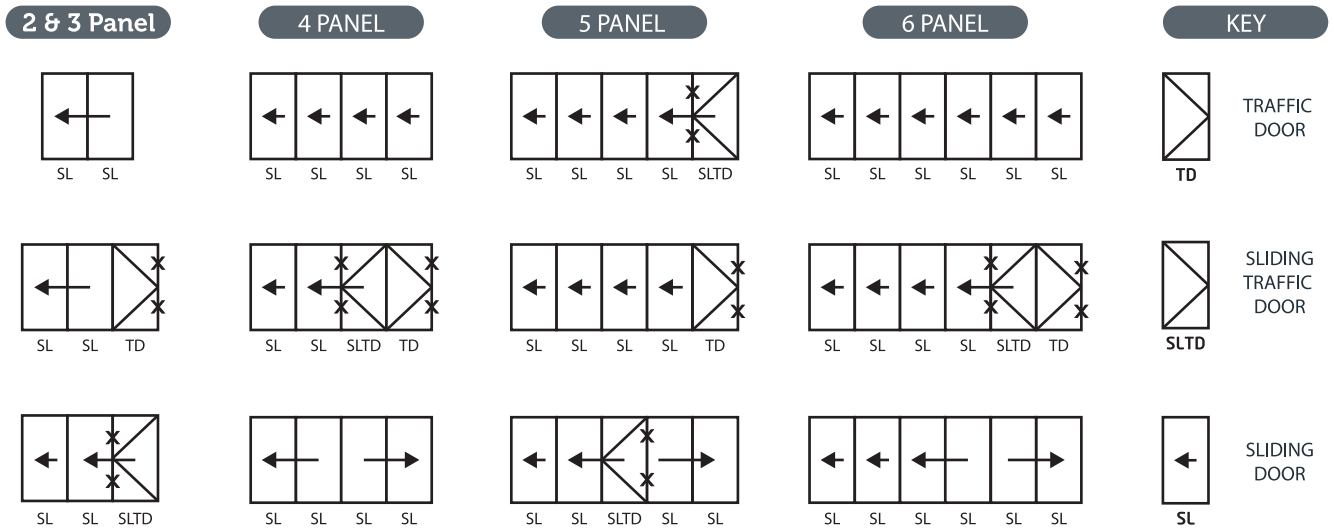
THRESHOLD AND CILL OPTIONS

FLEXIBLE DESIGN

Allstyle bi-folding doors take up much less room than a standard door, without the need to centre them on a supporting wall. Common door arrangements can be seen to the right.

These doors can be up to 2.5 metres high and have a maximum panel width of 1200mm. Traffic doors can hinge like a conventional door or as a French door.

These door arrangements are shown opening to the left but are also available opening to the right, and opening inwards or outwards.



EXTEND YOUR LIVING SPACE

FLEXIBLE DESIGN OPTIONS FOR ANY APPLICATION

CENTRE GLASS TO GLASS SIGHT LINES FROM 136.5MM

SLIMLINE FRENCH DOOR

FEATURE RICH, MODERN BIFOLDING DOORS

INTEGRATED BLIND SYSTEMS

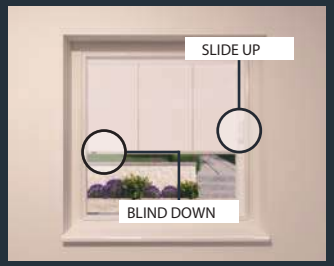
Bifolds are available with threshold and cill options too, allowing you to blend inside and out. Choose from a rebated (weathered) threshold or low thresher and cills. Bifolds run smoothly inside tracks.

Stainless steel or matching coloured hardware like handles and hinges is available. Optional keyed locking on slave handle(s) to further secure, & multi-point locking systems for ultimate security on bifolds.

We are able to powder coat to any RAL colour in both single and dual colour, and can supply a matte finish. A marine grade powder coat is also available if required.

Integrated blinds can be installed within our sealed glass units and are available in a range of colours to complement your windows, doors and decoration.

Blinds are operated by a cleverly-designed magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider.



TWIN & TRIPLE TRACK DOORS ALLOW MUCH WIDER PANELS THAN A BI-FOLD

SLIDING PATIO DOORS

Allstyle sliding patio doors will truly give you a room with a view. Robust aluminium sections allow the creation of wide passage-ways and huge glazed areas with fewer sightlines. Your views will have less frame and more glass, meaning maximum natural light.

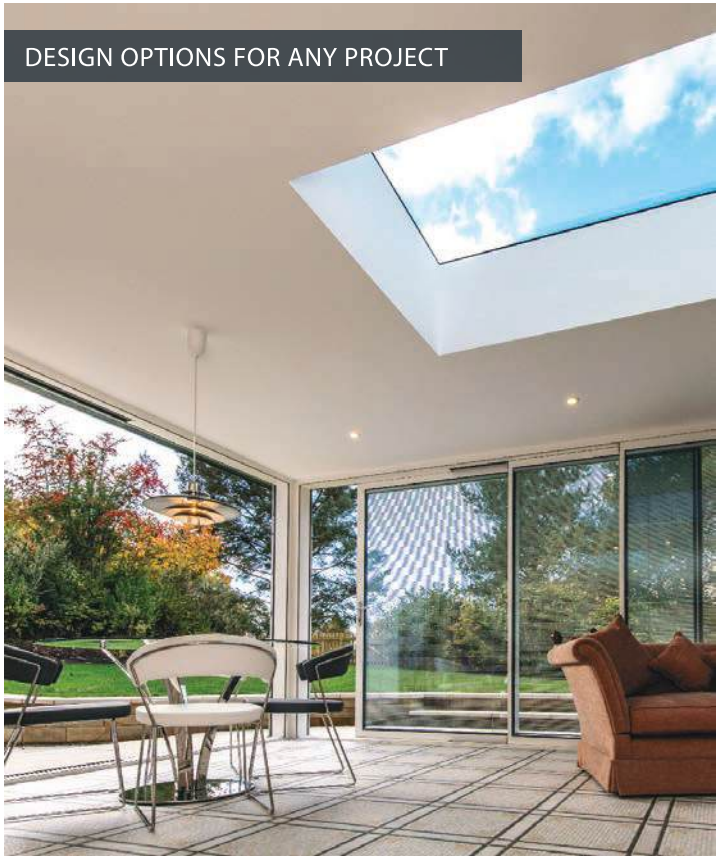
Panels that slide to the left or right sit within an outerframe and there is a wide range of sliding combinations. Allsyle patio doors are perfect for balconies.

REDUCED SIGHTLINES

CREATE LARGE GLAZED OPENINGS WITH ALLSTYLE ALUMINIUM SLIDING DOORS

Key features of our sliding patio doors:

- Domestic and commercial use as fixed lights & horizontal sliding doors.
- Weight limit 300Kg (sash)
- Doc L compliance
- u-Value: 1.2 W/m^{2}K achieveable dependant on chosen glass spec
- Polyamide thermal break to allow dual colour
- Double or triple glazed units
- Huge range of powder coat colours and finishes.



DESIGN OPTIONS FOR ANY PROJECT

ALUMINIUM WINDOW SYSTEMS

Aluminium is the smart choice for any renovation or homebuilding project. It combines strength and durability in a lightweight material, allowing slim frames to create clean designs.

Multi-point steel locking mechanisms that exceed the British Standards for security, & key-locking handles on opening lights.

Allstyle windows and doors are thermally efficient, contributing to a reduction in the cost of your heating bills.

ALUMINIUM CASEMENT WINDOWS

Made to measure, our windows can be manufactured as fixed windows, side hung, top hung, open out, sash windows, tilt and turns, angled windows and bay windows. They are all appropriate for both residential and commercial applications, while meeting DOC L building regulations.

Manufacture in any RAL colour and with a matte finish. Dual colour coating available for inside/outside, where required too.

Our aluminium frames are virtually maintenance free and will provide you with years of service.

THE FLUSH LOOK WINDOW SYSTEM

The Allstyle Flush Look is a window system that is seamless in appearance, with sleek and slim sightlines.

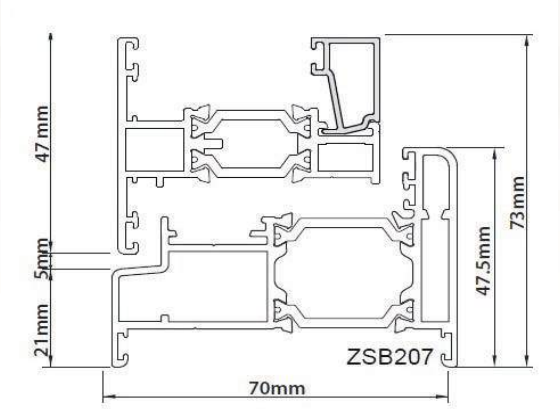
Viewed externally, the opening sash sits level with the outer frame in the closed position. This provides a sight line which is much more appealing to the eye than a traditionally made casement window.

Designed for top or side-hung, opening-out windows, this unique window is manufactured exclusively in the UK. We have a wide selection of carefully selected hardware to suit any design and what's more, the Flush Look system complements our bifolding doors perfectly.

Features & Specifications:

- High-Security bi-directional pincer multi-point mechanism with key lockable night vent position
- Fully compliant with Doc L of the Building Regulations (Conservation of Fuel and Power)
- Compliance with Document Q when specified
- Window Energy Rating up to A
- Concealed mullions and Transoms with slim sash to sash sightlines of just 102mm
- The in-line flush look is a perfect match with our bifolding doors.

A CONTEMPORARY AND CLASSIC AESTHETIC FOR MODERN LIVING



HERITAGE WINDOWS & DOORS

The Heritage system boasts slender sightlines meticulously crafted to faithfully replicate the aesthetic of steel-framed windows and traditional glazed metal doors.

An ideal solution for individuals seeking the timeless allure of period charm but blended with cutting-edge technology and contemporary features.

Features & Specifications:

- Fully compliant with Doc L of the Building Regulations (Conservation of Fuel and Power)
- Approved replacement for listed building projects
- Compliance with Document Q when specified
- Window Energy Rating up to A
- Heritage and Art Deco handle options

FINISHING TOUCHES AND FURNITURE

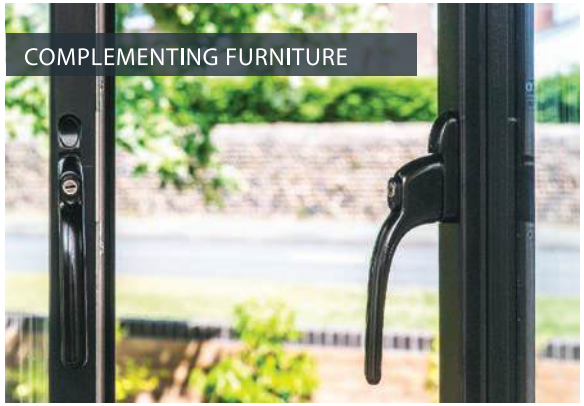
Tear Drop & Monkey-Tail Handles

With an elegant design that has been inspired by traditional 19th century ironmongery, Tear Drop or Monkey-Tail Handles are the perfect finishing touch for the Flush Look Aluminium Window.

- Strength tested to equivalent of a modern espagnolette window handle
- Strong espagnolette operator
- Manufactured from die-cast zinc with specially formulated finish
- Harder wearing finish than traditional wrought iron furniture
- Create a perfectly matching heritage window
- Key locking & Security enabled

Espagnolette Handle

- A die-cast aluminium lever that is the perfect balance of price and performance.
- Solid zinc baseplate for stability and security.
- Includes a heavy-duty sprung latching block with a positive and reassuring click on closing.
- Long handle, with 50mm window clearance for greater leverage. Easily operated without catching a hand on the window.
- A classic design with a contemporary twist so you can create an elegant and stylish window.
- Patented cover caps with colour coordinated finish. Perfectly matching components, even down to the smallest details.



BESPOKE SOLUTIONS

As one of the UK's largest and most experienced manufacturers, we have a wide knowledge base and a vast combined experience in the design and production of a range of truly bespoke glazing solutions.

MODERN GLAZING

COMPLETE ALUMINIUM SYSTEMS

ENDLESS DESIGN POSSIBILITIES

TILT & TURN WINDOWS

LET US HELP YOU MAXIMISE THE POTENTIAL OF YOUR PROJECT

For those looking for a sleek design that can give both excellent ventilation and a much larger opening potential, the Allstyle Tilt and Turn is the way forward. Opening in, Tilt and Turn windows are perfect for a balconies and low level glazing where an open out window just won't do. Larger apertures are also possible with Tilt and Turn.

Allstyle Tilt and Turn windows are available with all of the same matching finishes and fixtures as our other window and door systems.

In the Tilt position, windows can open inwards from the bottom (as below) allowing you to open windows for ventilation while maintaining security.

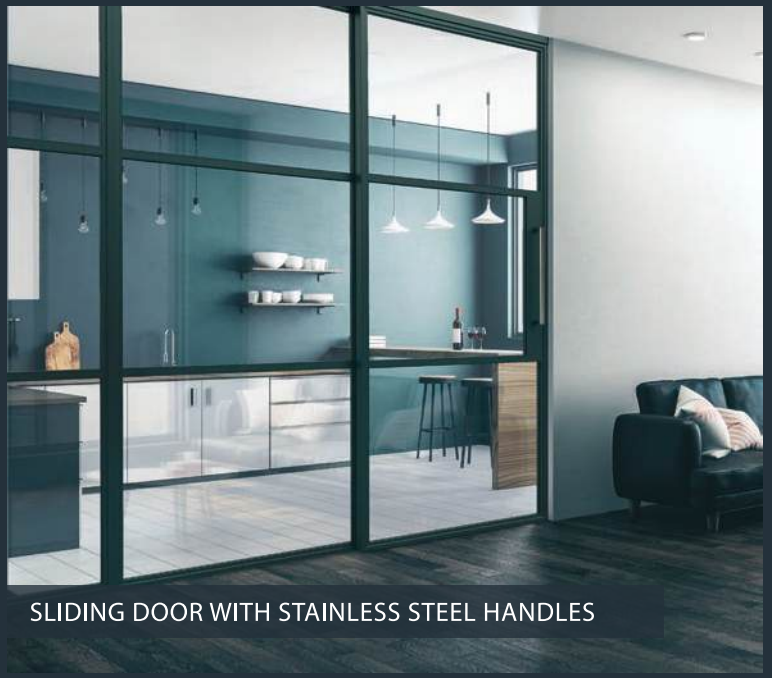
The Turn position allows the window to open fully inwards in the normal way from the side. Flexibility is the key advantage of Tilt & Turn windows.

A SECURE VENTILATION OPTION

INTERNAL DOORS & SCREENS

Our range of internal doors and screens are suitable for all sorts of internal environments. Developed to create light and airy internal spaces, the single-glazed system comes with a range of art deco handle options.

Available in both hinged single and double doors, along with sliding options, this adaptable system offers a wide array of design possibilities when combined with the sleek and slim fixed screens. Locking is also available for use in office spaces and bathrooms.



SLIDING DOOR WITH STAINLESS STEEL HANDLES

INTERNAL FRENCH DOOR WITH SIDE SCREENS

STAINLESS STEEL HARDWARE

Bifolds and Residential doors

Make your bifolds and entrances stand out with our marine grade traffic door handles. They are dual sprung and will always return to their horizontal position.

Patio Door Handles

Modern slide handles designed for patio doors. The pull bar is available as dual poles, or with a simple finger pull internally.

For Entrance Doors

Angled T-Bar pull bars are ideal when a handle needs to be offset from the fixing point.

Window Hardware

A sleek and lockable espagnolette handle that is sprung to keep the lever in place and cranked to avoid clashing with the frame.

ALLSTYLE
DESIGNER DOORS

A carefully assembled range of doors to suit all types and style of home. The modern and stylish Designer Doors offer a wide range of designs, colours and styles for you to choose from.

Precision construction and high-quality locking mechanisms combine to give strength and security. Glazing choice and door furniture have such an impact on the overall appearance - choose from fixed, side, or head-light glazing combinations, as well as single or double doors to create your perfecct design.

An extensive selection of colours and a range of stainless steel door handles, knockers and letter-plates provide those perfect finishing touches.

Every door is manufactured by specialists so that whatever the weather, you can be certain that your door is engineered to last.

High Security and Performance as Standard:

- Tested to PAS 24:2016 Enhanced Security Performance
- 3 adjustable hinges & resistant to 80kg of pressure
- 66mm triple glazed and laminated glass units
- All profiles include a polyamide thermal barrier that enhances thermal performance
- Thermally efficient, with a u-value from 0.9W/m^2K to 1.1W/m^2K, dependant on the glass specified
- Double-rebated EPDM centre gaskets provide maximum weather protection
- 10-point locking for high security
- Hardened stainless steel and picking protection pins provide tamper-protection
- Laser-cut key profiles prevent use of unauthorised keys
- Hidden hinge protectors - security against external impacts

Fully insulated panel & polyamide thermal barrier provide enhanced performance and energy efficiency

Hidden hinge protectors that further secure your door

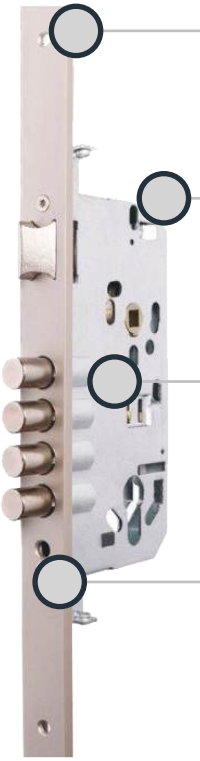
A range of bespoke accessories

Elegant aluminium profiles provide strength and durability

High quality 10-point locking mechanism for enhanced security performance

Structurally robust construction that requires minimal maintenance while delivering outstanding performance over a lifetime of use.

Integrated weather bar for additional protection against wind and rain



Door sashes sit flush internally and externally with the outer frame for an elegant finish

'Block door' construction incorporates a totally hidden sash and fixing system for added security

Lock body is encased and protected by the hidden door sash and external aluminium skin, creating an additional 5mm of external aluminium wall.

High security 10-point lock and escutcheon plate system, with a drill proof 'anti-bump' cylinder, fitted as standard

DOORS

We offer a range of high-security, robust doors to complement our window range, Anything from a functional rear door, French doors to open up a patio or balcony area, to a range of bespoke entrance doors complete with a choice of designer stainless steel handles and feature panels. The choices and colours are practically endless.

Our ranges of doors suitable for the architectural, commercial, public, new build and retail markets. The doors available are commercial hinged, commercial swing, patio, tilt and slide, slide folding, multi-track slide and automatic. Doors are designed for use as open out or open in, single or double doors, with sidelight options for domestic and/or commercial applications.

EXTEND YOUR LIVING SPACE

CONSERVATORY STRUCTURES

The classic conservatory is a great way of creating extra living space without extending your home. They traditionally offer a great vantage point to enjoy a garden as they contain more glass than wall space.

Orangeries are also great for creating more living space. They are both traditional and contemporary - with brick pillars, they tend to have more wall than glass which makes them a more private room than a conservatory.

We can create a conservatory extension to fit most spaces. Create lots of natural light and airy spaces with an Allstyle conservatory. Available in a huge range of colours and designs, there is a suitable solution for all projects.

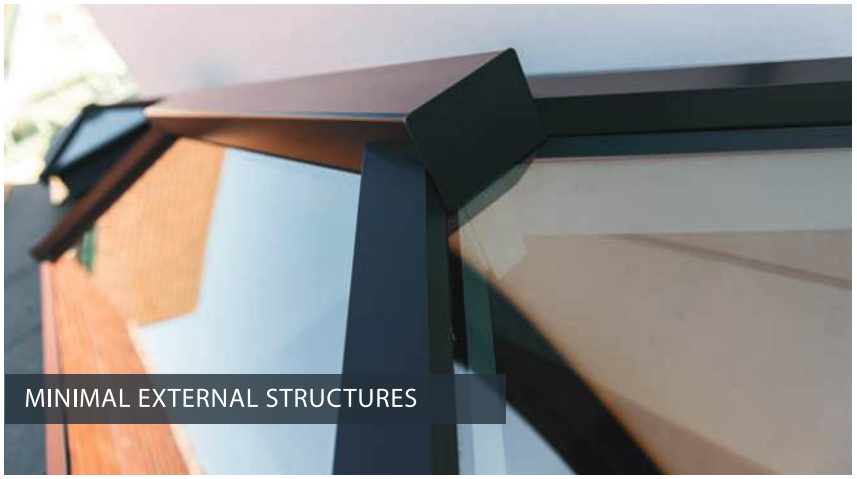
Our conservatory roof systems are an excellent standard and very well thought-out. By offering many options for tackling difficult sites, where box gutters and other features are required, we also consistently come up with innovative solutions to design problems.

ENJOY YOUR GARDEN ALL YEAR ROUND

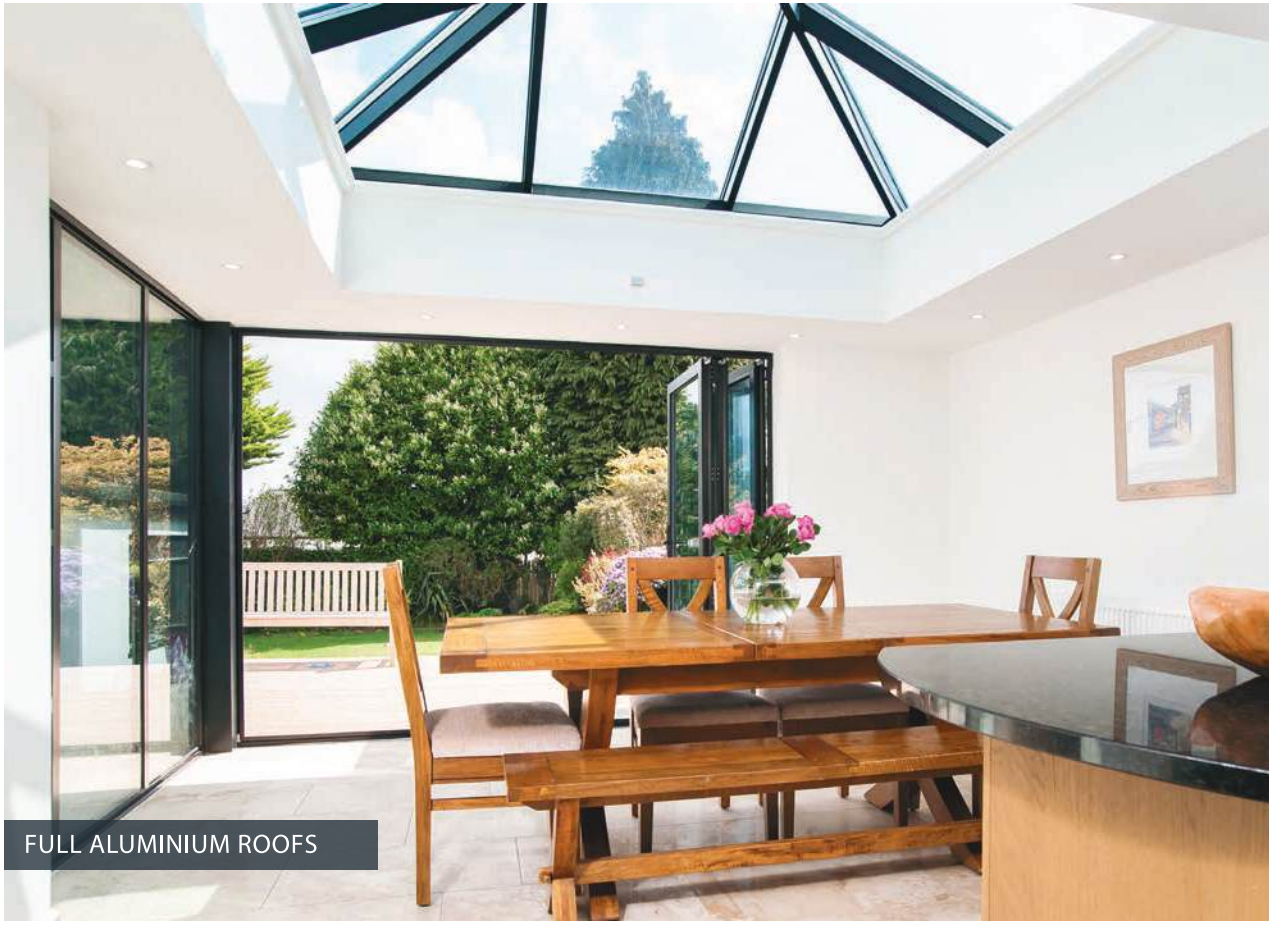
LANTERNS & ROOFLIGHTS

Whether you are replacing an existing roof, or building a new extension, an Allstyle lantern roof is an ideal way to draw more natural light into your room.

Our lanterns offer exceptional benefits - both the internal and external appearance complement any home, flooding it with as much natural light as possible.



MINIMAL EXTERNAL STRUCTURES



FULL ALUMINIUM ROOFS

Ultra slim frames are achieved with the impressive strength to weight ratio of aluminium and ensure that sightlines are minimal. As our rooflights are fully aluminium, with no plastic caps, bosses or hoods, we can design roofs in any RAL colour to complement existing or additional home improvements made in aluminium.

The thermal insulation in an aluminium roof will ensure that your room is comfortable all year round. You will also reduce the risk of condensation and cloudiness.
